## **DETAILED ACTION**

Page 2

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 5,815,370 to Sutton. In FIG. 1, Sutton teaches a semiconductor cooling device comprising a cold plate (22) for cooling a semiconductor element, a condenser (18), and a positive-displacement refrigerant pump (12; claim 5), said cold plate, condenser and refrigerant pump being fluid connected in series with each other to define a refrigerating cycle (see FIG. 1).

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent 6,519,955 to Marsala, in view of U.S. Patent 6,587,336 to Chu et al. Marsala discloses applicant's basic inventive concept, a semiconductor cooling device comprising a cold plate (18, FIG. 1) for cooling a semiconductor element, a condenser (28, FIG. 1), a receiver tank (36, FIG.

Application/Control Number: 10/807,066 Page 3

Art Unit: 3744

1) and a refrigerant pump (12, FIG. 1), wherein said cold plate, condenser, receiver tank and

refrigerant pump are in fluid connection in series with each other to define a refrigerating cycle

(see FIG. 1), substantially as claimed with the exception of stating that the refrigerant pump is a

centrifugal refrigerant pump. Chu shows the use of a centrifugal refrigerant pump (56, FIG. 2;

col 5, line 42) to be old in the cooling art. Therefore, it would have been obvious to one having

ordinary skill in the art at the time the invention was made from the teaching of Chu to modify

the system of Marsala, by using a centrifugal pump as a refrigerant pump in order to provide

enough circulation power for a miniature system needed to be cooled (col 5, lines 41-42).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure.

U.S. Patent 6,942,018 to Goodson, Kenneth E. et al. teaches an electroosmotic

microchannel cooling system.

Art Unit: 3744

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Filip Zec whose telephone number is (571) 272-4815. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl Tyler can be reached on 571-272-4834. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
